PG 1700

Responsive to the Official Action of April 8, 2002, please further amend the above-identified application as follows.

IN THE CLAIMS

Please amend Claim 1 as in the attached.

1. (Twice Amended) A coating composition to form a coating layer or film of a hydrophilic polyurethane resin having a moisture permeability and being non-porous, which comprises an isocyanate group-containing prepolymer obtained by reacting diphenylmethane diisocyanate with the following mixture of polyoxyalkylene polyols:

a mixture of polyoxyalkylene polyols which contains at least 60 wt%, based on the mixture of polyoxyalkylene polyols, of a polyoxyethylene polyol, said polyoxyethylene polyol having at least three hydroxyl groups and having an oxyethylene group-content of at least 10 wt%, based on the polyoxyethylene polyol; wherein said mixture of polyoxyalkylene
